

TRIM KIT consists of upper back rail, right and left upper sides, bottom front support and bottom back support. Also included, two 10-32 x 3/8" pan head self tapping screws and two 1/4-20 Kev Nuts.

After removing existing DCS 27" or G.E. Monogram 27" grill from grill island. Note for a gas pipe location, modifications may be required to island to relocate gas inlet.

### STEP 1:

Prepare to install your *Artisan*<sup>TM</sup> Trim Kit assembly by removing the countertop support ring attached to the firebox of the BBQ.

Note: Save the **PERIMETER RING BRACKET** and the 6 screws as they will be needed later.

Access these screws by removing the grill cooking grates and setting them aside.

The countertop support ring is attached with 3 screws on each side of the firebox. (See Figure # 1)

PERIMETER RING BRACKET

### STEP 2:

Assemble your *Artisan*<sup>TM</sup> TRIM KIT by attaching the upper back rail using self-tapping screws.

Note: Remove PVC coating and install conversion kit

**TIP:** Do not tighten the screws at this time. Leave them loose for easier assembly and fasten all screws as a final step.

Figure # 3

Back & Front Bottom Supports to be mounted to existing Grill Island or Insulated kit. Ensure bottom front grill support is flush with front edge of the island. Supports can be screwed in or glued using construction adhesive.

### STEP 3:

Slide grill front off edge of table or work bench. Remove PVC coating and mount right and left upper trim kit sides using factory screws, nuts and washers. Use the 2 screws supplied with Kit to fasten the upper back rail to the upper sides going from back rail into sides (See Figure # 2 & 3). Snug all fasteners at this time making sure Kit rails are flush and neat with grill sides. Starting from the upper back rail with grill hood closed and moving to the sides. The Grill hood can be opened once upper back rail is tightened to access remaining screws.

**Note:** Make Gas connection in accordance with Grill manufactures instructions. Slide Grill into place.
